

Throwback Thursday: Old Posts Republished

Deltik, Thursday 16 June 2016 - 00:00:00

The Deltik news feed just got a lot more content. Having found some old backups of this website, I performed a manual merge of the salvageable news articles and comments from all of Deltik's history dating back to 2008.

For historical preservation, I republished these old articles and comments. Most of the posts don't have a user assigned to them anymore, so they show up as user ID 2, "Legacy User".

You're welcome to browse them by going back to the earliest pages, They're probably not all that relevant anymore, but it could be interesting to see how different things were back then.
